Homework n° 1 - Microsoft PowerBI

The first homework concerns the development of a dashboard in Microsoft PowerBI for the analysis about COVID-19 pandemic data. In particular, it is required to analyze data available at the following links (https://github.com/pcm-dpc/COVID-19 and https://github.com/italia/covid19-opendata-vaccini) in order to create a dashboard, whose output must be reported within a pdf file of 8/10 pages (whose name will be name_surname_homework_1).

The file structure should include the following information:

- Problem introduction and dataset characterization;
- Dashboard analysis with relevant comments about graphs.

This homework can be done individually or in groups of up to two people. In the case of groups, the output must be at least 15 pages.

The deadline for the homework is Friday, April 9, 2021.
